A BIBLIOGRAPHY ON THE PSYCHOLOGICAL ASPECTS OF SMOKING:
JANUARY 1940 THROUGH SEPTEMBER 1966

BERNARD J. FINE, MICHAEL MARCHESE AND DONALD R. SWEENEY^B

U. S. Army Research Institute of Environmental Medicine, Natick, Mass.

Summary.—142 items concerned with psychological aspects of smoking are listed alphabetically.

The bibliography which follows was prepared from a thorough search of both *Psychological Abstracts* and *Index Medicus* as well as from the reference sections of pertinent articles.

The authors have exercised their judgment by including some articles which appear to be peripheral to psychology but which they feel merit further investigation and by excluding some articles which are essentially subjective or "popularized" science. Several subjective articles were included for their "thought" value.
